

In Class Programming

Bring the Mississippi into your classroom or community group! Our educators can deliver a variety of programs that can help connect people to the Mississippi River.

Below is a list of some of our most common programs. All of them can be adapted to groups of any age. We can also work with groups to develop programming that relates to their curriculum or goals.

- Understand your watershed
- Water quality testing
- Transportation on the river
- Creatures of the Mississippi
- Schoolyard Runoff Assessment
- Nature Art
- Poetry of water

We are happy to make one-time visits to a group but we prefer to build long-term relationships with groups so we can build deep connections to the river through ongoing programming. Contact us to discuss how we could partner or check out the [River of Words Curriculum](#) to see the program we can offer.
